

Make the **simple** choice.

CLEAR ALIGNERS,
DESIGNED DIFFERENTLY

TRADITIONALLY
SCALLOPED TRIM

SimplyClear[®]
Clear Aligners

OPTIMIZED TRIM

The Difference is SimplyClear®

A trim designed for comfort and control

Aligner trim lines affect how the appliance fits around the teeth and gums.

SimplyClear® aligners are precisely trimmed and polished along the gingival margin for a close, comfortable fit designed to support retention and consistent tracking.

DEEP SCALLOPING

SIMPLYCLEAR® TRIM

PRECISION-FINISHED TRIM

Precisely trimmed and polished along the gingival margin to support comfort, retention, and consistent tracking.

SELF-ADAPTIVE MATERIAL

Powered by a multilayer polymer designed to balance flexibility and rigidity across different tooth movements.

COMFORT & EASE OF WEAR

High-elasticity material with improved memory delivers gentle, consistent force to support planned tooth movement.

VIRTUALLY INVISIBLE

Stays clear and discreet, letting your natural smile shine through.

TEAR RESISTANCE

Durable material helps resist tearing and maintain the aligner's structure during normal use.

STAIN RESISTANCE

Engineered to resist staining during normal wear.
